HAZERA A global leading SEED COMPANY

Hazera brings expertise, commitment and support, combining decades of experience with state-of-the-art technology. Hazera breeds, develops, produces and markets varieties and seeds in a wide range of vegetable crops, actively covering the needs of partners throughout global fresh produce chains. Our experts actively engage with partners all over these chains to evaluate their needs, assisting with variety selection and providing guidance and support throughout the entire crop cycle. We offer you true partnership, bringing superior value through our variety breeding and products.

COMPLETE RANGE OF Crops Hazera offers varieties in a wide range of crops including tomato, onion, pepper, watermelon, headed cabbage, cauliflower, broccoli, melon, cucumber, radish, leek and lettuce.

Beside agronomic qualities such as yield and disease resistance, Hazera is focusing on qualities required by the fresh chain such as year round supply, long shelf life, attractiveness, suitability for transportation, nutritional qualities, taste and convenience.

LIMAGRAIN GROUP

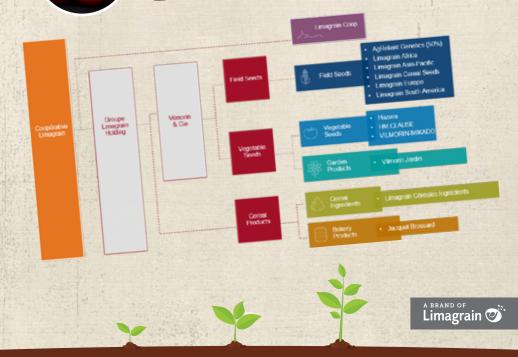

Hazera is part of the Limagrain Group, an international cooperative agri-business based in France.

and the second second

Limagrain is the largest seed company in Europe and the second largest company worldwide in the vegetable seeds sector.

HM. Clause, Vilmorin and Hazera are part of the Vegetable seed division of Limagrain. Together we are continously developing new and innovative tomato varieties for you.

In the Experience Center in Bleiswijk you will find our latest range!

MEET OUR TEAM

The most satisfying in my job? Reaching the best performance of a variety in close cooperation with the grower

> Marcel van Kester Crop Specialist High Tech Tomato

The most exciting is selecting the best varieties to make our partners successful

Geert van der Wel Regional Product Manager High Tech Tomato

It is great to actively work together with our partners to get our tomatoes into international retail chains

> Arjan van Steekelenburg Fresh Chain Manager

The main goal for me is developing the higest value for all chain partners

> Karel Welten Crop Specialist High Tech Tomato

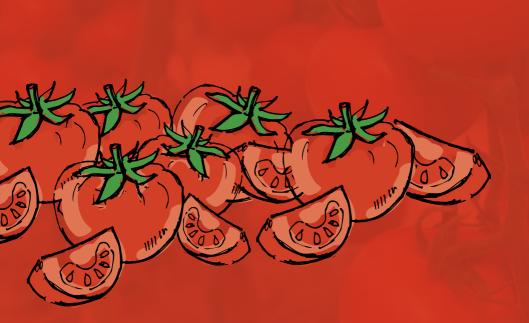

Proud of our total portfolio in the High Tech Market

Yaron Giras Global Product Manager Tomato

Resistant varieties may exhibit some disease symptoms or damage under heavy pest pressure and/or under adverse environmental conditions and/or in the face of new biotypes, pathotypes, races or strains of the pest that may emerge. Soil temperature above 27°C and other stresses may cause nematode resistance to break. Please refer to the ISF definitions at twww.vordised.org/wp-content/uploads/2017/05/Definition_on_reaction_plants_to_pests_2017_Inal.pdf. A copy of the definitions for terms describing reactions of plants to pests for the Vegetable Seed Industry, can be obtained at our offices upon demand. **Attention:** This information and any complementary/other vrédato in written information that may be given on behalf of Hazera, present average results of specific trials; these are neither exhaustive nor necessarily accurate and may not be regarded as advice, guidance, recommendation, representation or warranty.
